Expertise that adds value

Prime Consulting International is a professional consulting group offering specialised services to an international market. Headquartered in New Zealand and Australia, with subsidiaries and representative offices in the Pacific Islands, Asia, the Middle East and Africa, our work incorporates assignments for governments, industry bodies and large corporates through to small and medium sized private enterprises. We have core technical competencies in the agri-business and food, renewable energy and water sectors, along with proven expertise in project and programme management. We operate as a management services contractor and business solutions integrator across a wide range of industries in both developed and developing countries. International development assistance projects are a specialty.

Strategic thinking combined with practical solutions

Our strength is the facilitation of sustainable business within a value chain approach. We combine management and technical solutions to remove barriers, add capacity and manage risk. Inputs into the policy environment are similarly focused on enabling private sector development balanced with cross-cutting social and environmental considerations. We seek long term business relationships with our clients and are able to be involved in the entire project or business lifecycle, providing specific input of expertise in focused areas.

**We approach all
of our assignments

**Our programmes
have touched
the lives of
more than six
million people**

International development assistance programmes

Prime has designed, managed or consulted on international development assistance programmes valued at more than USD 100 million.

These programmes have covered these main subject matter areas:

- Agriculture and rural development
- Marketing and processing of food and agriculture products
- Rural and urban water supply
- Renewable energy systems – solar and hydro power

Our international development assistance programmes have impacted on the lives of more than six million people, with an economic value estimated at more than USD 250 million.

Notable results achieved include a 200 per cent increase in average farm wheat yields (from 1.3 to 3.9 tonnes/hectare) during one of our major agricultural development programmes in Afghanistan over a period of six years.

During the same programme, we also achieved a 191 per cent increase in average potato yields, a 303 per cent decrease in livestock mortality rates and a 60 per cent increase in total farm incomes.

Clients/donors we have worked for include the Asian Development Bank (ADB), the United Kingdom's Department for International Development (DFID), the New Zealand Aid Programme, Danida (Denmark), the United States Agency for International Development (USAID) and the Governments of the People's Republic of China, Hong Kong, Malaysia and Singapore.

We have also worked for the Malaysian National Agricultural Training Council, peak industry bodies in New Zealand and Australia and multinational and local private sector businesses in multiple countries.
